

IDPH Weekly Influenza Surveillance Report

Week ending May 2, 2009¹ Influenza Activity Level: **SPORADIC²**

CDC Week	Sentinel Providers - %ILI	Lab Confirmed Specimens
17	3.97	80

Illinois Sentinel Provider Surveillance Network

Influenza & Pneumonia Mortality in Selected Illinois Cities

Novel Influenza A (H1N1) Virus
One hundred sixty US confirmed human infections with swine origin influenza A (H1N1) virus have been confirmed in 21 states as of 5/2/09.

Illinois Sentinel Provider Data

Weekly data reported from participating medical practitioners attributing patient office visits to "influenza like illness" (ILI)³

• Age 0-4	513
• Age 5-24	606
• Age 25-64	323
• 65 +	49

Influenza & Pneumonia Mortality Surveillance

- Data from CDC 122 Cities Morbidity and Mortality Reporting System
- All age groups represented
- No influenza-associated pediatric deaths were reported nation-wide for CDC week 17.

Laboratory Surveillance

- Respiratory illness in military recruits at NRTC Great Lakes was reported at or below expected value.
- Eighty specimens have been reported to IDPH for CDC week 17 (specimens tested between 4/26/09-5/2/09).

• Influenza A (H1)	29
• Influenza A (H3)	42
• Influenza A (unknown)	2
• Influenza B	7

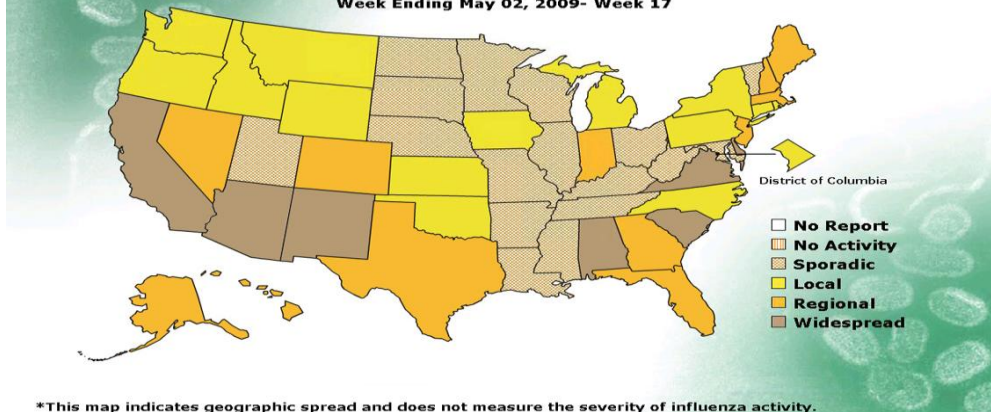

National Influenza Surveillance

Seven states reported widespread activity, 12 states reported regional activity, the District of Columbia and 14 states reported local activity and Puerto Rico and 17 states reported sporadic activity.

Because CDC did not release data for week 16, there will not be a weekly report for that week.

FLUVIEW

¹Data in this report is provisional and will be updated weekly.

No activity: No laboratory confirmed cases of influenza and no reported increase in cases of influenza like illness (ILI).

²Sporadic: Small numbers of laboratory confirmed influenza cases or a single laboratory confirmed influenza in a single region of the state.

Local: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in a single region of the state.

Regional: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in at least two but less than half the regions of the state.

Widespread: Outbreaks of influenza or increases in ILI cases and recent laboratory confirmed influenza in at least half the regions in the state.

³"Influenza like Illness" is defined as fever $\geq 100^{\circ}\text{F}$ and cough and/or sore throat.

*Threshold=3.66%

**ILI data excluding the City of Chicago
