

IDPH Weekly Influenza Surveillance Report

Week ending August 1, 2009¹ Influenza Activity Level: **SPORADIC²**

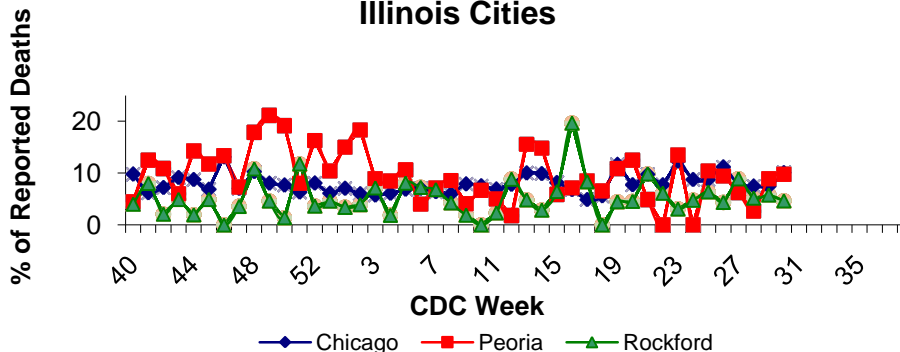

CDC Week	Sentinel Providers - %ILI	Lab Confirmed Specimens
30	1.32	17

Illinois Sentinel Provider Surveillance Network

Influenza & Pneumonia Mortality in Selected Illinois Cities

Novel Influenza A (H1N1) Virus

CDC discontinued reporting of individual confirmed and probable cases of novel H1N1 infection on July 24, 2009. CDC will report the total number of hospitalizations and deaths weekly. As of August 1, 2009, there have been 6,506 hospitalizations and 436 deaths associated with the novel H1N1 flu outbreak. These have been reported from 51 states and territories, including District of Columbia, American Samoa, Guam, Puerto Rico and the US Virgin Islands. Click the following link for details: <http://www.cdc.gov/h1n1flu/update.htm>

Illinois Sentinel Provider Data¹

Weekly data reported from participating medical practitioners attributing patient office visits to "influenza like illness" (ILI)³

- Age 0-4 171
- Age 5-24 104
- Age 25-64 20
- 65 + 15

Influenza & Pneumonia Mortality Surveillance

- Data from CDC 122 Cities Morbidity and Mortality Reporting System
- All age groups represented
- One influenza-associated pediatric death was reported nation-wide and was associated with novel influenza A (H1N1) virus for CDC week 30.

Great Lakes Naval Academy Febrile Respiratory Illness Surveillance Update

Febrile respiratory illness in military recruits at NRTC Great Lakes was reported as substantially elevated.

Laboratory Surveillance⁴

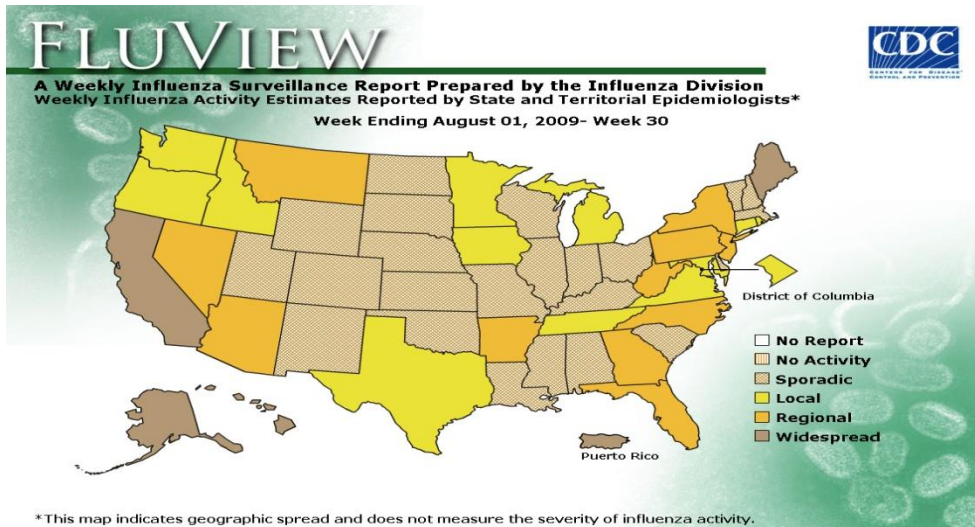

- Seventeen specimens have been reported by IDPH laboratory for week ending 8/1/09.
- Influenza A (H1) 0
- Influenza A (H3) 0
- Influenza A (unknown) 0
- Influenza B 1
- Novel Influenza A (H1N1) 16

National Influenza Surveillance

Four states and Puerto Rico reported widespread activity, 11 states reported regional activity, 12 states and the District of Columbia reported local activity and 23 states reported sporadic activity.

*This map indicates geographic spread and does not measure the severity of influenza activity.

No activity: No laboratory confirmed cases of influenza and no reported increase in cases of influenza like illness (ILI).

²Sporadic: Small numbers of laboratory confirmed influenza cases or a single laboratory confirmed influenza in a single region of the state.

Local: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in a single region of the state.

Regional: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in at least two but less than half the regions of the state.

Widespread: Outbreaks of influenza or increases in ILI cases and recent laboratory confirmed influenza in at least half the regions in the state.

³"Influenza like Illness" is defined as fever $\geq 100^{\circ}\text{F}$ and cough and/or sore throat.

*Threshold=3.66%

**ILI data excluding the City of Chicago
