

HEALTHY ILLINOIS 2021

Your feedback is needed on health improvement efforts underway in Illinois.

The State Health Improvement Plan (SHIP), State Health Assessment (SHA), and State Innovation Model (SIM) are three statewide initiatives that focus on improving the health of Illinois residents. Collectively, these initiatives are called Healthy Illinois 2021.

These processes help us understand the current health status in Illinois and establish health improvement strategies that address needs and gaps and engage all aspects of the public health system. Participants in focus groups, presentations, and webinars will be asked to provide feedback on the current state of health and their work related to health improvement.

Join the conversation in any of the following ways:

Participate in a Focus Group

Register here: <http://www.cvent.com/d/brqzrb>
