

Healthy Illinois 2021

Measures of Success

Health improvement in Illinois would look like:

1. Aligned clinical and primary prevention that results in effective, efficient partnerships to drive health improvement.
2. A holistic view of the patient that incorporates social determinants drivers of health serving as the foundation for models of clinical care and preventive strategies.
3. Effective data systems that allow for better patient care by reducing redundancies and communicating measures and outcomes to providers and partners.
4. Aligned quality measures that are based on evidence and supported by payment incentives.
5. Innovation fostered through the continual growth of evidence based strategies and best practices that result in improved health outcomes, increased patient and provider satisfaction, and stabilized costs.
6. A comprehensive approach to consumer education that promotes health literacy, use of a medical home, and overall competency for navigating the health system.
7. A workforce that maximizes the potential of current workers and cultivates new workers in order to address gaps and the needs of the health system.
8. Decisions are made using a community oriented, asset-based approach to increasing prevention activities that address social determinants of health.
