

Evaluating *We Choose Health*

UIC Institute for
UNIVERSITY OF ILLINOIS Health Research and Policy
AT CHICAGO SCHOOL OF PUBLIC HEALTH

Presentation Overview

- Introductions
- Context of Community Transformation Grants Evaluation
- Evaluation studies
- Baseline data
- Performance Monitoring
 - Coordinated School Health example
- Q & A

Evaluation Team

- University of Illinois, School of Public Health and the Institute for Health Research and Policy
 - William Baldyga, MA, DrPH — Lead Evaluator
 - Karen Peters, DrPH — Co-Investigator
 - Amber DiMascio, MPH — Project Director
 - Dan Canfield — Research Specialist
- MidAmerica Center for Public Health Practice
 - Jason Rothstein, MPH — Performance Management Pinch Hitter

Evaluation Partnerships

- *WCH* evaluation is a partnership between IDPH and UIC researchers to measure the impact and effectiveness of *WCH* interventions
- Work with you to make evaluation as useful and simple as possible

Community Transformation Grants and Evaluation

- *WCH* is part of a national program, the Community Transformation Grants (CTGs), to reduce chronic disease by promoting healthy lifestyles
- 36 states and communities received \$70m for implementation awards
- Building the evidence base

Community Transformation Grants and Evaluation

- National studies
 - Context scan
 - understanding the obesity prevention context within broader community
 - Targeted Surveillance
 - School Environment study
 - 5 core measures

5 core measures

CTG awardees will assess changes across the population and among population subgroups in funded communities on **Five Core Measures** reported to CDC during the first year of funding and at least twice more during the project period:

- weight
- proper nutrition
- physical activity
- tobacco use prevalence
- emotional well-being and overall mental health

Local Evaluation

Goals

- Conduct rigorous evaluations
 - Ongoing for midcourse correction
 - Outcome
- Build evidence-base
- Address health disparities
- Leverage gains toward future IL efforts

Evaluation Focus Areas

- Healthy Hearts Campaign
- Joint Use Agreements
- Coordinated School Health
 - BMI Surveillance

Healthy Hearts

- Outcomes related to cholesterol and blood pressure
- Novel intervention
- Significant contribution to the evidence base

Joint Use Agreements

- Little known. Many opportunities to add knowledge
- Evaluation questions:
 - Are the needs of the community being met?
 - Does JUA lead to more physical activity?
 - Reach of JUA; how far will people travel?
 - Relationship between community awareness and participation

BMI Surveillance: Overview

Rationale: Need for school and community specific BMI data available to IDPH and the community.

Goals: To evaluate best practice approaches to BMI surveillance, to develop a surveillance systems for Illinois, and to implement that systems.

Key Players: CTG CSH awardees, IDPH, UIC evaluation team, other statewide partners

BMI Surveillance: Next Steps

- Create a working group (September 2012)
- Develop an environmental scan tool to collect information about current practices for BMI data collection in CTG communities (October, 2012)
- Complete environmental scan with assistance from CTG awardees
- Compile and disseminate scan results (December 1, 2012)
- Collect BMI data among CTG CSH awardees

Collection of Baseline Data

- Purpose: To allow for measurement of progress on IDPH level objectives over time
- Majority of work is policy implementation based
- Will require data collection in several areas:
 - Number and type of policies at baseline
 - For recruited partners, a categorization of the current policy, potential reach, and address
 - These will be compared to implemented policies

Performance Monitoring

What?

Performance Monitoring

Why?

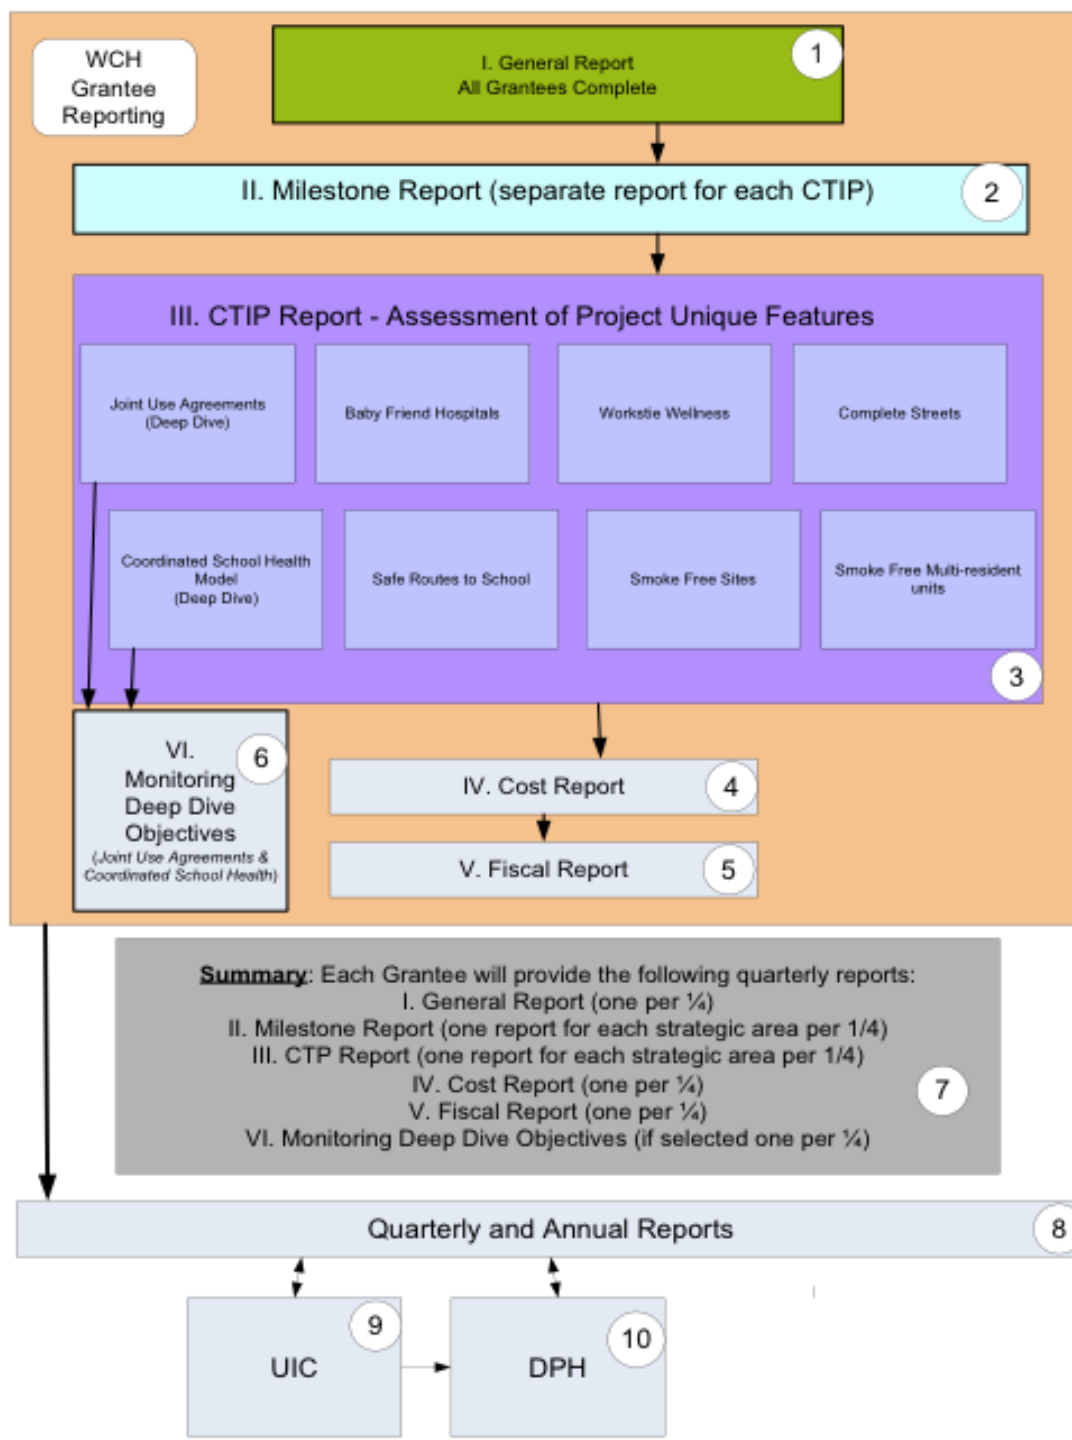

Performance Monitoring

Who?

Performance Monitoring

How?

Performance Monitoring

IDPH expects:

- Timeliness
- Accuracy
- Patience

YOU should expect:

- Feedback
- Help

Performance Monitoring

- Grantee Tools in Development
 - General Report (one per grantee)
 - Milestone Report (one per selected CTIP)
 - CTIP Report (one per selected CTIP)
 - Reporting Checklist
- IDPH/UIC Tools in Development
 - Report Summaries
 - Analytics
 - Dashboards?

Support

- Reporting Support
 - Webinars
 - E-mail
 - Phone
- Project Support
 - Report-based response
 - E-mail
